12/1/80

Dear Dr. Nirenberg:

Thanks again for your help in putting my grant proposals together. I hope your recent travels have been pleasant.

Please find enclosed:

- ① A complete copy of the NIH proposal for your files.

(The NIH now has a complete package. I sent a copy of the same grant to NSF. With my application to Dr. O'Reilly, that makes three applications out now).

- ② A cover sheet for the Soman Kunyon grant which must be signed and returned to me in the S.A.S.E. provided. This I need A.S.A.P., please.

- ③ Instructions for you for the material I need to complete my applications to

Damon Runyon and Muscular Dystrophy.
If you find it simpler, you can send
me the originals for each and I
can run off the copies myself and
forward them to the agencies.

These letters (and C.V., publications,
etc) are less urgent than the
cover letter (item #2) which I
need right away.

With these other two grants in, I'll
have five possibilities riding. I'm
confident enough to stop there,
unless you come up with some
other idea.

Thank you once again for your
help.

Sincerely,

Jerry Gurowald

A.S. - I met many of your
present and former postdocs
in Cincinnati. Had a great time -
they're a fine group of people, and I look forward to joining them.
